COMPANY PROFILE

ABOUT ANJIE

Door systems for industrial, commercial and residential projects.

Based in Nanjing, Jiangsu, China, Nanjing Anjie Door Industry Co., Ltd. brings together research and development, production, installation and after-sales service under the ANJIE brand. Our range supports access, security and environmental separation for factories, warehouses, shopping malls and homes.

Garage doors, PVC high speed doors and aluminum rolling shutters are key product lines, complemented by industrial sectional doors, steel windproof rolling doors and fire rated doors. We serve customers across Europe, the Americas, Africa, the Middle East and Southeast Asia.

THE ANJIE TEAM

15+

YEARS OF EXPERIENCE

50+

EXPORT COUNTRIES

Project Advice

Technical consultation helps match door types to the opening, traffic and operating environment.

Custom Design

Door configurations are tailored to project dimensions, functional requirements and the intended application.

International Supply

Coordinated support covers product selection, production and delivery for overseas customers.

Ongoing Support

Installation guidance and after-sales maintenance support customers throughout the service period.

Contact ANJIE for product selection, technical information and a tailored quotation.

01 / GARAGE DOORS

Automatic Steel Sectional Garage Door

Insulated overhead doors for residential garages

PRODUCT OVERVIEW

Steel sandwich panels with PU foam insulation combine a secure garage closure with smooth automatic overhead lifting. Panel finish, opening dimensions and access accessories can be configured to suit the building.

- Insulated steel panels with a choice of surface patterns
- Remote control opener for everyday vehicle access
- Optional vision windows and integrated pedestrian door

KEY SPECIFICATIONS

Panel construction	Double layer galvanized steel with PU foam insulation
Panel thickness	40 mm or 50 mm options
Opening system	Motorized sectional overhead lift
Opener configuration	1,000-1,800 N options; two remote controls and emergency lock
Standard garage size	Up to W 6,000 × H 3,500 mm; larger openings use an industrial configuration
Safety and finish	Anti-fall device; plain colors or woodgrain finishes

APPLICATIONS

Residential garages, villas and light commercial garage entrances.

Opener, track arrangement and safety accessories are selected to suit the door size and site.

OPTIONS

Vision windows, pedestrian door, wall switch, photocell and keypad.

PRODUCT DETAILS

01 / GARAGE DOORS

Automatic Aluminum Grid Garage Gate

Modern aluminum panels with automatic sectional lifting

PRODUCT OVERVIEW

An aluminum grid design gives residential garage entrances a clean architectural appearance. Automatic overhead lifting, remote control and customized dimensions support practical daily access, with panel construction and finish selected to match the building.

- Aluminum grid panel design for modern facades
- Remote operated sectional overhead movement
- Custom opening size, surface color and accessories

KEY SPECIFICATIONS

Panel material	Aluminum; PU foam insulated configuration available
Panel thickness	60 mm
Aluminum thickness	3 mm
Opening system	Automatic sectional overhead lift
Surface finish	Powder coating with customized color
Opener configuration	1,000-1,800 N; two remote controls and emergency lock

APPLICATIONS

Modern homes, residential garages and exterior garage entrances.

OPTIONS

Tempered glass panel, pedestrian door, wall switch, photocell and keypad.

PRODUCT DETAILS

01 / GARAGE DOORS

Aluminum Full View Glass Garage Door

Tempered glass and aluminum frames for light filled entrances

PRODUCT OVERVIEW

Full view glazing brings daylight and visibility to garage entrances and commercial facades. Aluminum framing and automatic sectional lifting provide a clean architectural appearance, with glazing and finish options selected for each project.

- Full view aluminum frame with tempered glass panels
- Motorized sectional lifting with remote control
- Custom frame color, glazing layout and opening size

KEY SPECIFICATIONS

Construction	Aluminum alloy frame with tempered glass panels
Nominal thickness	42 mm
Glass choices	Clear or frosted; insulated glazing can be specified
Opening system	Electric sectional lift; track layout selected to the building
Frame finish	Powder coated; customized color
Control and safety	Remote control opener; photocell and safety accessories available

APPLICATIONS

Showrooms, modern villas, retail facades and commercial garage openings.

Glass selection, wind exposure and track space are reviewed for the final configuration.

OPTIONS

Frame color, glass type, panel layout, opener and safety accessories.

PRODUCT DETAILS

01 / GARAGE DOORS

Golden Oak Woodgrain Steel Garage Door

Timber appearance with insulated steel sandwich panels

PRODUCT OVERVIEW

A golden oak finish gives this sectional garage door a warm timber appearance. PU filled steel panels, overhead lifting and remote operation suit residential projects that combine facade styling with practical daily access.

- Golden oak woodgrain finish for exterior facade matching
- PU foam insulated steel sandwich panels
- Motorized overhead opening with remote control

KEY SPECIFICATIONS

Panel construction	Galvanized steel with PU foam insulation
Panel thickness	40 mm or 50 mm options
Appearance	Golden oak woodgrain; other finishes available
Opening system	Automatic sectional overhead lift
Opener configuration	1,000-1,800 N options; two remote controls and emergency lock
Safety	Anti-fall device; safety accessories selected to the project

APPLICATIONS

Residential villas, private garages and exterior entrances with coordinated facade finishes.

Confirm finish samples, opening dimensions and available headroom before ordering.

OPTIONS

Vision windows, integrated pedestrian door, wall switch, photocell and keypad.

PRODUCT DETAILS

02 / PVC HIGH SPEED DOORS

PVC High Speed Roll Up Door

Rapid flexible curtain access for busy industrial passages

PRODUCT OVERVIEW

A flexible PVC curtain and fast motor control support frequent movement through warehouses and production areas. Rapid opening, safety sensing and automatic activation help keep traffic moving while limiting the time an opening remains exposed.

- Adjustable speed for frequent industrial traffic
- Flexible PVC curtain with selectable frame materials
- Photocell, radar and push button controls

KEY SPECIFICATIONS

Curtain material	High density PVC fabric
Curtain thickness	0.9 mm or 1.3 mm
Running speed	Adjustable, 0.8-1.5 m/s
Frame options	Galvanized steel, aluminum or SS304 stainless steel
Motor options	Servo, SEW or SEJ; selected for the opening
Standard controls	Photocell, radar and push button

APPLICATIONS

Warehouses, factories, logistics centers and industrial workshops.

OPTIONS

Vision window, loop detector, remote control, light curtain, safety airbag, magnetic card and pull cord.

PRODUCT DETAILS

02 / PVC HIGH SPEED DOORS

Self Repairing Zipper High Speed Door

Curtain recovery and rapid access for forklift traffic areas

PRODUCT OVERVIEW

The zipper edge guides this flexible curtain back into its track after accidental displacement. Fast operation and selectable sensing support busy industrial passages, helping maintain separation between production areas while accommodating frequent forklift movement.

- Zipper edge supports curtain recovery after impact
- Adjustable speed for high frequency access
- Selectable activation and safety devices

KEY SPECIFICATIONS

Curtain material	High density PVC fabric
Curtain thickness	0.9 mm or 1.3 mm
Running speed	Adjustable, 0.8-1.5 m/s
Guide system	Self repairing zipper edge
Frame options	Galvanized steel, aluminum or SS304 stainless steel
Standard controls	Photocell, radar and push button

APPLICATIONS

Industrial workshops, logistics passages, manufacturing plants and forklift traffic areas.

OPTIONS

Servo, SEW or SEJ drive; vision window, interlock, loop detector and warning light.

PRODUCT DETAILS

02 / PVC HIGH SPEED DOORS

Thermal Insulation PVC High Speed Door

Rapid separation for areas requiring temperature control

PRODUCT OVERVIEW

Rapid opening helps limit exposure between temperature controlled areas and busy traffic routes. This PVC rolling door supports factories, warehouses and logistics facilities, with curtain, frame and thermal configuration selected for the intended operating conditions.

- Fast opening helps reduce open-door time
- Thermal configuration selected for the project
- Vision panel and automatic activation options

KEY SPECIFICATIONS

Curtain material	High density PVC fabric
Curtain thickness	0.9 mm or 1.3 mm
Running speed	Adjustable, 0.8-1.5 m/s
Frame options	Galvanized steel, aluminum or SS304 stainless steel
Standard controls	Photocell, radar and push button
Thermal configuration	Insulated curtain option selected for the application

APPLICATIONS

Warehouses, temperature controlled workshops, factories and logistics centers.

Thermal performance depends on the selected curtain and installation conditions.

OPTIONS

Insulated curtain, transparent vision panel, radar, loop detector and air curtain linkage.

PRODUCT DETAILS

02 / PVC HIGH SPEED DOORS

Flame Retardant High Speed Welding Door

Anti-spark fabric curtain for welding and robot production areas

PRODUCT OVERVIEW

A 2.0 mm anti-spark fabric curtain provides controlled separation around welding areas and robot production lines. Rapid movement, adjustable speed and selectable safety sensing support frequent access while keeping the opening aligned with workshop requirements.

- Flame retardant anti-spark fabric curtain
- Adjustable speed for frequent production access
- Custom dimensions and three curtain colors

KEY SPECIFICATIONS

Curtain material	High density anti-spark fabric
Curtain thickness	2.0 mm
Running speed	Adjustable, 0.8-1.5 m/s
Frame options	Steel or aluminum alloy
Curtain colors	Orange, blue or grey
Standard controls	Photocell, radar and push button

APPLICATIONS

Welding rooms, robot production lines, metal fabrication areas and maintenance bays.

Curtain and control selection should match the welding process and site safety requirements.

OPTIONS

Vision window, warning light, manual emergency chain and additional activation or safety sensors.

PRODUCT DETAILS

03 / ALUMINUM ROLLING SHUTTERS

Aluminum Louvered Roller Shutter

Motorized exterior access with airflow through the curtain

PRODUCT OVERVIEW

A motorized aluminum shutter for exterior openings where ventilation and compact storage are important. Its louvered curtain allows airflow, while the rolling arrangement keeps the entrance area clear and supports practical daily access for commercial premises.

- Ventilated louvered curtain
- Compact overhead rolling storage
- Convenient motorized operation

KEY SPECIFICATIONS

Curtain material	Aluminum alloy
Curtain design	Louvered profile for ventilation
Opening	Vertical roll-up movement
Drive options	Tubular or seated motor selected for the opening
Dimensions	Customized opening width and height
Finish	Customized curtain color

APPLICATIONS

Exterior security openings, ventilated shopfronts and commercial facades.

OPTIONS

Slat design, curtain color, drive, manual backup and operating controls.

PRODUCT DETAILS

03 / ALUMINUM ROLLING SHUTTERS

Wind Resistant Aluminum Roller Shutter

Compact rolling protection for exterior windows and commercial entrances

PRODUCT OVERVIEW

An aluminum rolling shutter for exterior windows, shops and commercial openings. The curtain rolls into compact overhead storage and can use hollow or PU filled slats, with guides, drive and finish selected for each installation.

- Aluminum curtain construction
- Hollow or PU filled slat options
- Manual or motorized operation

KEY SPECIFICATIONS

Curtain material	Double layer aluminum alloy
Slat construction	Hollow or filled with PU foam
Opening	Vertical roll-up movement
Operation	Manual or motorized configuration
Color options	Black, white, bronze, grey and woodgrain finishes
Dimensions	Customized to the project opening

APPLICATIONS

Exterior windows, shops, garages and industrial or commercial entrances.

Wind performance must be confirmed for the selected slat, guide and opening configuration.

OPTIONS

Vision slats, motor selection, manual backup, curtain color and guide configuration.

PRODUCT DETAILS

03 / ALUMINUM ROLLING SHUTTERS

Aluminum Workshop Shutter

Motorized industrial access with manual chain backup

PRODUCT OVERVIEW

An aluminum workshop shutter for industrial service openings and exterior storage entrances. Motorized roll-up operation and manual chain backup provide flexible access, while curtain profiles, guides and finishes can be configured to suit each project.

- Motorized daily access
- Manual chain backup
- Custom curtain and guide configuration

KEY SPECIFICATIONS

Curtain	Double layer aluminum alloy
Slat options	PU foam filled or hollow profiles
Opening method	Motorized vertical roll-up
Manual backup	Chain operation
Finish	Solid colors and wood-look finishes
Sizing	Configured to the project opening

APPLICATIONS

Industrial workshops, service buildings and exterior storage entrances.

OPTIONS

Remote control, wall switch, vision slats, safety sensors and custom colors.

PRODUCT DETAILS

03 / ALUMINUM ROLLING SHUTTERS

Insulated Aluminum Roller Door

PU-filled slats with optional vision windows

PRODUCT OVERVIEW

An insulated aluminum roll-up door for garages and commercial parking openings. PU-filled slats support thermal separation, while optional vision windows bring daylight into the space. Motorized operation keeps the entrance clear with compact overhead storage.

- Insulated aluminum slat construction
- Optional daylight and vision rows
- Compact motorized roll-up movement

KEY SPECIFICATIONS

Curtain	Double layer aluminum alloy
Insulation	PU foam filled slats
Windows	Optional vision slat rows
Motor	Tube or seated motor selected for the door configuration
Finish	Standard colors and wood-look finishes
Opening size	Customized width and height

APPLICATIONS

Exterior garages, service entrances and commercial parking openings.

OPTIONS

Manual backup, remote control, wall switch, safety sensors and custom colors.

PRODUCT DETAILS

04 / COLD STORAGE DOORS

Manual Cold Room Sliding Door

Insulated horizontal access for commercial refrigeration rooms

PRODUCT OVERVIEW

A manually operated insulated sliding door for refrigeration rooms with moderate traffic. Stainless steel surfaces, a polyurethane core and thermal sealing support everyday access, with the panel thickness and opening direction selected for the site.

- Simple manual horizontal sliding operation
- High density polyurethane insulation
- Durable guide system and thermal sealing

KEY SPECIFICATIONS

Face sheet	0.8 mm SS304 stainless steel
Panel thickness	100 or 150 mm
Insulation	High density polyurethane (PU) foam
Door frame	SS304 stainless steel
Opening direction	Horizontal sliding, left or right
Operation	Manual sliding

APPLICATIONS

Commercial refrigeration rooms, walk in coolers, food storage rooms and small freezer rooms.

OPTIONS

Heated frame, safety release, viewing window and custom opening dimensions.

PRODUCT DETAILS

04 / COLD STORAGE DOORS

Magnetic Self Repairing Cold Storage Door

Insulated rapid access with magnetic sealing

PRODUCT OVERVIEW

A magnetic sealing and self repairing curtain system supports frequent access in cold storage facilities. The 20 mm multilayer curtain combines fabric and aluminum foil, while adjustable opening speed and selectable controls suit daily traffic requirements.

- Magnetic sealing with a self repairing curtain system
- Five layer insulated curtain for frequent cold storage access
- Standard photocell, radar and push button controls

KEY SPECIFICATIONS

Curtain construction	20 mm; five layers of fabric and aluminum foil
Curtain layout	Middle zipper; no viewing windows
Door frame	Aluminum alloy
Hardware	SS304 stainless steel
Opening speed	Adjustable, 0.8-1.5 m/s
Motor options	Servo 0.75-1.5 / SEW 0.75-2.2 / SEJ 0.9-2.2 kW

APPLICATIONS

Cold storage facilities and refrigerated areas with frequent traffic.

OPTIONS

Loop detector, remote, light curtain, safety airbag, magnetic card or pull cord.

PRODUCT DETAILS

05 / RIGID HIGH SPEED SPIRAL DOORS

Industrial High Speed Spiral Door

Insulated rigid panels for rapid industrial access

PRODUCT OVERVIEW

Rigid insulated panels move on spiral tracks to provide rapid access for industrial openings. Aluminum skins, a polyurethane core and adjustable operating speed support daily vehicle traffic, with vision sections and control options available.

- Spiral lift mechanism with adjustable opening speed
- Double layer aluminum slats filled with polyurethane foam
- Photocell, radar and push button controls supplied as standard

KEY SPECIFICATIONS

Panel thickness	40 mm
Panel skin	0.8 mm aluminum
Opening speed	Adjustable, 0.8-2.0 m/s
Lift arrangement	Spiral tracks
Hardware	SS304 stainless steel
Colors	Silver, white, champagne or custom colors

APPLICATIONS

Factories, workshops, logistics facilities and commercial garages.

OPTIONS

Polycarbonate vision slats in three to five rows, additional controls and safety devices.

PRODUCT DETAILS

05 / RIGID HIGH SPEED SPIRAL DOORS

High Speed Spiral Garage Door

Rapid insulated access for garages and service bays

PRODUCT OVERVIEW

Designed for busy garage and service openings, this spiral door combines insulated aluminum panels with rapid motorized operation. Adjustable speed, selectable finishes and optional vision slats allow the door to match vehicle access needs.

- Spiral lifting arrangement for frequent vehicle access
- Insulated aluminum panels with a polyurethane foam core
- Selectable motor packages and customizable colors

KEY SPECIFICATIONS

Panel thickness	40 mm
Panel skin	0.8 mm aluminum
Opening speed	Adjustable, 0.8-2.0 m/s
Lift arrangement	Spiral tracks
Hardware	SS304 stainless steel
Motor options	Servo 0.75-1.5 / SEW 0.75-2.2 / SEJ 0.9-2.2 kW

APPLICATIONS

Commercial garages, service bays and industrial vehicle entrances.

OPTIONS

Polycarbonate vision slats, activation controls and safety devices; custom size and color.

PRODUCT DETAILS

06 / INDUSTRIAL SECTIONAL DOORS

Loading Dock Sectional Door

Insulated overhead access for warehouse loading bays

PRODUCT OVERVIEW

An insulated sectional door for loading bays, combining galvanized steel panels with a polyurethane foam core. Multiple lift arrangements and manual or automatic operation help match warehouse openings, while optional accessories support loading dock integration.

- Double galvanized steel skins with polyurethane foam insulation
- Three inch industrial hardware and standard anti-fall protection
- Automatic versions include a control box and two remotes

KEY SPECIFICATIONS

Panel thickness	40 or 50 mm
Steel skin	0.35 or 0.426 mm galvanized steel
Operation	Manual chain or automatic
Lift arrangements	Standard overhead, combined or vertical
Hardware	3-inch industrial hardware
Finish	Powder coating; custom colors

APPLICATIONS

Truck loading bays, warehouse docks, logistics facilities and factory dispatch areas.

OPTIONS

650 × 320 mm windows, pedestrian door, photocell, dock seals, bottom rubber seal and safety airbag.

PRODUCT DETAILS

06 / INDUSTRIAL SECTIONAL DOORS

Full Vision Glass Industrial Sectional Door

Glazed sectional access for commercial and workshop spaces

PRODUCT OVERVIEW

Transparent glazing and aluminum sections create a sectional door for spaces where visibility and presentation matter. Industrial hardware and a choice of lift arrangements support installation planning, with powered or manual chain operation available.

- Glass panels within aluminum sections provide a full view design
- Three inch industrial sectional hardware
- Glazing and frame finish choices suit display and workshop environments

KEY SPECIFICATIONS

Construction	Glass panels within aluminum sections
Glazing	Clear or frosted glass
Operation	Electric overhead or manual chain
Lift arrangements	Standard, combined or vertical tracks
Hardware	3-inch industrial sectional hardware
Customization	Custom aluminum frame colors and door sizes

APPLICATIONS

Showrooms, car service centers, display workshops and commercial buildings.

OPTIONS

Safety sensors, activation controls, glazing and aluminum frame finish.

PRODUCT DETAILS

07 / STEEL WINDPROOF ROLLING DOORS

Wind Resistant Steel Roller Door

Reinforced steel rolling access for exposed industrial openings

PRODUCT OVERVIEW

A motorized steel rolling door designed for exposed industrial openings, using a galvanized curtain, reinforced side guides and a bottom beam. Specify the opening size, wind configuration and safety accessories for the building and site.

- Reinforced side guides and bottom beam support the curtain assembly
- Industrial motor with control box, remote and wall switch
- Manual chain backup for operation during a power interruption

KEY SPECIFICATIONS

Curtain material	Galvanized steel
Movement	Motorized vertical roll-up
Reinforcement	Reinforced side guides and bottom beam
Controls	Control box, remote control and wall switch
Manual backup	Manual chain
Finish	Powder coating; custom colors

APPLICATIONS

Coastal industrial buildings, ports and logistics facilities.

Confirm the required wind performance for the actual opening and site conditions.

OPTIONS

Hood, photocell and safety edge; custom size and guide configuration.

PRODUCT DETAILS

07 / STEEL WINDPROOF ROLLING DOORS

Perforated Steel Security Shutter

Ventilated steel closure for retail and parking access

PRODUCT OVERVIEW

Designed for retail, shopping center and parking openings that need airflow and partial visibility. The perforated steel shutter combines motorized vertical movement with reinforced guides, customizable finishes and safety control options for daily access.

- Airflow and partial visibility
- Galvanized steel curtain
- Reinforced side guide rails

KEY SPECIFICATIONS

Curtain	Galvanized steel slats
Guide rails	Reinforced steel side guides
Opening method	Motorized vertical roll-up
Bottom beam	Reinforced beam with optional safety edge
Finish	Powder coated in standard or custom colors
Sizing	Customized to the opening and wind load requirement

APPLICATIONS

Retail stores, shopping centers and parking facilities.

Wind resistance depends on the confirmed opening, slat profile and guide configuration.

OPTIONS

Manual chain backup, remote control, wall switch, photo sensor, safety edge and hood box.

PRODUCT DETAILS

08 / AUTOMATIC FOLDING DOORS

Insulated Industrial Bi-Folding Door

Horizontal side folding access for wide industrial openings

PRODUCT OVERVIEW

An industrial folding door for factories, warehouses and commercial openings requiring wide access. Selected panels, steel framing and motorized operation provide a practical entrance system, with insulation and safety accessories configured to suit the site.

- Folding layout for wide access
- Optional insulated panels
- Electric drive with manual backup

KEY SPECIFICATIONS

Structure	Steel frame with panels selected for the project
Opening	Horizontal side folding or bi-folding configuration
Operation	Electric motor with manual backup
Insulation	Optional insulated panels and sealing system
Controls	Remote control, push button and access control options
Size and finish	Custom dimensions; painted or powder coated finish

APPLICATIONS

Factories, warehouses, workshops, hangars and large commercial openings.

Final panel layout and installation dimensions follow approved project drawings.

OPTIONS

Windows, pedestrian door, photocell, safety edge, emergency stop and access control.

PRODUCT DETAILS

09 / POLYCARBONATE ROLLING SHUTTERS

Polycarbonate Security Roller Shutter

Clear display visibility with electric rolling access

PRODUCT OVERVIEW

A transparent rolling shutter for retail and commercial openings that need visibility when closed. Clear polycarbonate panels combine display presentation with a compact rolling arrangement, while motorized operation and custom sizing support convenient daily access.

- Maintains display visibility when closed
- Electric opening and closing
- Compact overhead storage

KEY SPECIFICATIONS

Curtain material	Transparent polycarbonate slats
Slat thickness	1.2-2.0 mm
Connections	Aluminum alloy or stainless steel tubes
Hardware	SS304 stainless steel
Running speed	0.15-0.2 m/s
Operation	Tube motor; remote control, wall switch and manual chain

APPLICATIONS

Retail stores, shopping malls, display entrances and commercial premises.

OPTIONS

Custom opening width and height, connection material and operating controls.

PRODUCT DETAILS

10 / FIRE RATED DOORS

Stainless Steel Fire Rated Door

Stainless steel surfaces for clean and demanding facilities

PRODUCT OVERVIEW

A fire door option with stainless steel surfaces and a steel frame for clean facilities, hospitals and food processing areas. Opening dimensions, hardware and required fire performance are reviewed together to establish a suitable project configuration.

- Stainless steel surface finish
- Single or double swing opening
- Door hardware selected for the project

KEY SPECIFICATIONS

Door surface	Stainless steel
Frame	Steel frame
Opening	Single or double swing configuration
Dimensions	Customized to the building opening
Hardware	Lock, closer and push bar options
Typical use	Clean facilities and fire separation openings

APPLICATIONS

Clean rooms, hospitals, food processing facilities and pharmaceutical factories.

Confirm required fire performance and the complete door assembly before ordering.

OPTIONS

Opening arrangement, frame dimensions, lock, closer and push bar.

PRODUCT DETAILS

10 / FIRE RATED DOORS

Fire Rated Exit Door with Panic Bar

Steel swing access with push bar exit hardware

PRODUCT OVERVIEW

A steel swing door for evacuation routes and everyday access in public, commercial and industrial buildings. Galvanized steel panels, a panic bar and selected closing hardware are combined with a customized opening layout and powder coated finish.

- Panic bar exit operation
- Single or double swing layout
- Custom powder coated finish

KEY SPECIFICATIONS

Door panels	Galvanized steel
Panel thickness	50 mm
Opening	Single or double swing
Exit device	Panic bar
Hardware	Door closer and project specific lock options
Finish	Powder coating with customized color

APPLICATIONS

Public buildings, schools, commercial exits, stairwells and evacuation corridors.

Required fire performance must be confirmed for the complete door assembly.

OPTIONS

Custom dimensions, swing arrangement, panic hardware, closer, lock selection and surface color.

PRODUCT DETAILS

11 / BLAST RESISTANT DOORS

Industrial Blast Resistant Steel Door

Reinforced manual access for protected industrial openings

PRODUCT OVERVIEW

A reinforced steel door for workshops, utility rooms and protected industrial access points. Manual swing operation, heavy duty hardware and a project specific frame arrangement provide a practical closure tailored to opening dimensions and site requirements.

- Reinforced steel construction
- Manual swing operation
- Custom frame and hardware configuration

KEY SPECIFICATIONS

Construction	Reinforced steel panel and frame
Operation	Manual swing
Hinges	Heavy duty hinge configuration
Access hardware	Handle and lock options
Finish	Primer, paint or powder coating
Dimensions	Customized according to the opening

APPLICATIONS

Industrial workshops, equipment rooms, plant security zones and utility service openings.

Blast performance requires project specific engineering and supporting test evidence.

OPTIONS

Door dimensions, frame details, hinges, handles, locks and surface finish.

PRODUCT DETAILS

12 / AUTOMATIC RETRACTABLE GATES

Stainless Steel Retractable Gate

Motorized perimeter access for industrial and commercial sites

PRODUCT OVERVIEW

An automatic retractable gate for factories, industrial parks and logistics facilities. The stainless steel structure folds and slides to open the entrance, with motorized operation, remote control and access control options configured for site requirements.

- 304 stainless steel construction
- Compact retractable movement
- Remote and access control options

KEY SPECIFICATIONS

Gate material	304 stainless steel
Standard height	1,600 mm; other heights can be customized
Wheel spacing	800-900 mm
Movement	Retractable folding and sliding, left or right
Operation	Motorized drive with remote or access control
Hardware	304 stainless steel

APPLICATIONS

Factories, industrial parks, logistics facilities and manufacturing sites.

Confirm entrance width, ground condition and retracted space before production.

OPTIONS

Custom gate length, height and appearance; optional LED display and access control.

PRODUCT DETAILS
